PROFESSIONAL SUMMARY

Sales & Business Development professional with hands-on experience in **lead generation, client communication, requirement gathering, and customer onboarding**. Proven ability to engage prospective customers, qualify leads, manage end-to-end client interactions, and build AI-powered automation solutions that improve business efficiency. Skilled in **lead research, CRM workflows, Python, AI automation, and stakeholder communication**, with entrepreneurial experience delivering client projects and supporting business growth through data-driven decision-making.

WORK EXPERIENCE

Marketing And Business Development Intern | Internship — Jan 2025 - Aug 2025
Vidyalaya Kunji — *Remote • Pune, Maharashtra*

- Managed end-to-end communication with **204 prospective applicants** for university admissions counseling, converting **37 leads into paid customers** through structured requirements gathering and consultative client engagement.
- Developed a **college recommendation web application** using **Python, Django, and MongoDB**, trained on **5,000 student preference records**. Matched students based on location, budget, academic interests, and preferences, achieving a **60% recommendation success rate** and automating workflows that eliminated the need for **2 junior counselor roles**.
- Built an **AI-powered personalized university brochure and PDF generation system** using **Python, MongoDB, and the OpenAI API**, reducing document preparation time from several hours to **under 10 minutes per applicant** and removing a manual documentation process.
- Managed **Meta Ads campaigns** with a budget of approximately **$435**, increasing social media engagement by **40%** and lead generation by **38%**. Optimized budget allocation toward peak-performing days (Fri–Sun), contributing to an estimated **40% improvement in campaign ROI**.
- Presented campaign performance and student behavior insights to non-technical stakeholders, translating complex data into actionable recommendations that informed marketing and admissions decisions.

Technologies / Skills Used : *Business Analysis, Client Communication, Python, MongoDB, OpenAI API, Meta Ads, Campaign Analytics, Django*

Founder and CEO | Self-employed — Mar 2024 - Nov 2024
Mivyapar — *Hybrid • Pune, Maharashtra*

- Founded **MiVyapar a website builder** aggregator platform where small business clients enter a **single prompt** and instantly see generated website designs from multiple builders **(Wix, Hostinger, Shopify)** side by side, eliminating the need to visit each platform separately — conceptualized, designed, and led e**nd-to-end implementation of the entire platform.**
- Acquired and delivered **3 client** projects **end-to-end managing** requirement gathering, builder selection, website creation, SEO implementation, and p**ost-delivery support** for small businesses with project budgets ranging form **$150 to $530 USD,** achieving zero client escalations across all deliverers.
- Coordinated a **7-member team across design**, development, and content — **maintaining quality and timelines** across multiple concurrent client projects.

Technologies / Skills Used : *Entrepreneurship, Product Thinking, Client Onboarding, Team Leadership, Requirement Gathering, SEO, Business Operations*

PROJECTS

Under Armour — Customer Retention Analytics [Retail] | Github — Feb 2026 - Jun 2026
Data Analyst

- Analyzed **200K customers**, **3M transactions**, **2M sessions**, and **600K recommendation events** to evaluate **churn and retention patterns** at scale.
- Identified **37,131 churned customers** (**18.57% churn rate**); **One-Time Buyers** exhibited a **55.10% churn rate**, facilitating targeted **re-engagement strategies** by segment.
- Developed RFM segments: VIP (41,345), Regular (38,439), Loyal (21,900), and Lost/Dormant (51,862) customers to enhance retail client segmentation workflows.

Technologies / Tools Used : *Python, SQL, Pandas, Power BI, RFM Analysis, Churn Analysis*

DiscoverIQ - Ecommerce Discovery Analytics [Ecommerce] | Github — Jan 2026 - Jun 2026
Ecommerce Analyst

- **Analyzed** 6.54M sessions, 3.09M users, 268K products, 726 brands, and 18 categories to assess performance.
- **Discovered** revenue decline from **$27.02M** to **$20.36M** despite an increase in sessions from **3.12M** to **3.42M**.
- **Identified** a conversion drop from **2.82%** to **2.05%** and a significant cart abandonment increase from **13.68%** to **67.73%**.

Technologies / Tools Used : *Python, SQL, Pandas, DuckDB, Power BI, Funnel Analysis*

Google Maps Lead Generation System | Github — Jan 2026 - Feb 2026
AI Automation Developer

- Developed an **AI-powered lead generation system** using **n8n** to extract business leads from Google Maps based on location, industry, or search query.
- Integrated Serper.dev, **Perplexity AI**, and **GPT-4o** to enhance business information, identify decision-makers, and generate qualified prospect lists.
- Created a **conversational AI interface** allowing users to search for businesses naturally and obtain structured business details for unlimited leads.
- Automated the lead discovery workflow, decreasing manual prospecting time by over **90%** and producing sales-ready datasets for outreach campaigns.

Technologies / Tools Used : *n8n, GPT-4o, Serper.dev, Perplexity AI, Google Maps, REST APIs, AI Automation*

Supply Chain Analytics Dashboard [Logistics] | Github — Nov 2025 - Dec 2025
Supply Chain Analyst

- Developed a **Power BI** dashboard integrating **suppliers**, **products**, **inventory**, **procurement**, **manufacturing**, **shipments**, **logistics**, **customers**, and **sales data**.
- Created six report pages featuring **executive overview,** supplier analytics, inventory, production, shipment, and **customer revenue analysis.**
- Identified supplier bottlenecks, **shipment delays**, inventory risks, product defects, and **revenue performance.**

Technologies / Tools Used : *Power Query, DAX, CSV, Supply Chain Analytics, KPI Reporting, Power BI*

SKILLS

Programming Languages :	Python, SQL
Frameworks & Libraries :	Pandas, NumPy, Matplotlib, Django
BI & Visualization :	Power BI, DAX, Power Query, Tableau, Excel, Advanced Excel
Databases & Platforms :	MongoDB, PostgreSQL, MS SQL Server, GitHub, AWS, Kaggle, Jira, Notion
Analytics Skills :	Data Cleaning, EDA, Funnel Analysis, Customer Segmentation, Churn Analysis, RFM Analysis, A/B Testing, Cohort Analysis, KPI Analysis, Dashboard Building, ETL Basics, Data Storytelling
Client & Business: :	Client Onboarding, Implementation Support, Stakeholder Communication, Requirement Gathering, Business Analysis, Presentation Building, Problem Solving, Strategic Thinking

EDUCATION

Vishwakarma University | Pune, Maharashtra , India — Sep 2023 - Jun 2027
Bachelor of Technology — *CGPA : 8.2*

2nd Position – Wilo Water Pvt. Ltd. Hackathon
Proposed an underwater data center city concept to **reduce electricity usage** in data center cooling, inspired by **Microsoft's underwater** data center model.
3rd Position – Innovest Fest | Binghamton University x Vishwakarma University
Developed a hand-gesture-controlled website interface for remote screen interaction, inspired by **Iron Man**; awarded a **$99 USD prize**.
